Davyd Konstantinov

Junior AI Automation Specialist | Telegram bots, n8n, Python (AI-assisted) | Remote

Bratislava, Slovakia | +421 910 392 871 | davidcoolld@gmail.com | Portfolio with videos: davidcooll23.github.io

Profile

I build business automations and chatbots with AI as my main development tool (Claude Code): I turn a business need into clear requirements, build the solution, test it and keep it running. Every project below works and is shown on video. Looking for a junior role in a team that uses AI in everyday development.

Practical skills

- Telegram bots (aiogram 3), n8n workflows, Google Sheets API, web scraping
- AI APIs (Gemini, Claude): assistants that answer from a company's own data
- Git/GitHub, Docker; secrets in .env, Semgrep and gitleaks scans
- Manual testing, clear bug reports; basic HTML, CSS and JavaScript

Selected projects

Salon booking bot with AI assistant | Telegram

Service, free slot, confirmation; the owner gets each booking in Telegram. The AI assistant answers from the price list. Python, aiogram 3, Gemini API.

Website leads to Google Sheets + Telegram | n8n

Form requests land in a spreadsheet and Telegram within seconds; webhook protected by a secret header. n8n (self-hosted), Google Sheets, Telegram Bot API.

Classifieds monitor | Python

Watches bazos.sk with filters, sends new matches to Telegram and a table, no duplicates, alert if it stops. Python, requests, BeautifulSoup, gspread.

PC Music Remote | Wear OS + Windows

A watch controls media and volume on a PC over the local network, with pairing and reconnection. C#/.NET 8, ASP.NET Core, WebSocket; Kotlin/Compose.

All projects are my own, built with AI assistants (Claude Code) as the main tool; videos on the portfolio site.

Languages

Ukrainian, Russian: native.
English: B2, confident written communication.
Slovak: strong comprehension, everyday spoken communication.

Availability

Lives in Bratislava, Slovakia, with the right to work in Slovakia. Fully remote, full-time or part-time; an employer in Slovakia or via an EOR.

Education

Central Ukrainian National Technical University, Kropyvnytskyi, Ukraine. September 2018 - June 2022.
