Davyd Konstantinov

Customer & Technical Support (L1) | Ukrainian, Russian, English, Slovak | Remote

Bratislava, Slovakia | +421 910 392 871 | davidcoolld@gmail.com | Portfolio with videos: davidcooll23.github.io

Profile

Support specialist with a technical background. I answer customers in four languages, find out what really went wrong and explain the fix in plain words. I build and run my own Telegram bots and automations, so I know where users get stuck and how to trace a problem through settings, logs and integrations. Calm, patient, careful with written replies.

What I bring

- Chat, e-mail and calls in Ukrainian, Russian, English and Slovak
- Troubleshooting: reproduce the issue, check settings and logs, find the cause, confirm it is fixed
- Clear step-by-step instructions for customers and precise bug reports for developers
- Tools: Windows, Telegram, Google Sheets, Git/GitHub, AI assistants (Claude, ChatGPT, Gemini) for fast and accurate answers

Projects I support myself

Salon booking bot with AI assistant | Telegram

Customers book a slot in the chat; the AI assistant answers questions from the price list. I know every step a customer takes and every place it can fail.

Website leads to Google Sheets + Telegram | n8n

Form requests reach a spreadsheet and Telegram within seconds; integration setup and access secured with a secret header.

Classifieds monitor | Python

Watches bazos.sk and alerts in Telegram; no duplicates, alerts the owner if it stops.

All projects are my own, built with AI assistants (Claude Code) as the main tool; videos on the portfolio site.

Languages

Ukrainian, Russian: native.
English: B2, confident written communication.
Slovak: strong comprehension, everyday spoken communication.

Availability

Lives in Bratislava, Slovakia, with the right to work in Slovakia. Fully remote, full-time or part-time; an employer in Slovakia or via an EOR.

Education

Central Ukrainian National Technical University, Kropyvnytskyi, Ukraine. September 2018 - June 2022.
